### Amendments To The Claims

The listing of claims presented below will replace all prior versions, and listings, of claims in the application.

#### Listing of claims:

1. (currently amended) A duster for use ~~in on~~ a vehicle having a frame ~~20 into~~ which is capable of being connected to a sack-shaped dust cloth ~~40 is inserted~~ and a handle ~~30~~ formed to extend toward one side of the frame ~~20~~, comprising:  
  
a magnetic sheet ~~40~~ having magnetism and provided in the frame ~~20~~,  
  
wherein the frame ~~20~~ ~~is closely adhered to~~ capable of being pulled toward the exterior of the vehicle by means of magnetism to provide friction between the sack-shaped dust cloth connected to the frame and the exterior of the vehicle,  
  
and  
  
wherein the magnetic sheet is divided to form small-sized magnetic sheets,  
  
and wherein the duster further comprises:  
  
a number of receiving grooves into which the small-sized magnetic sheets are selectively received, wherein the receiving grooves are separated by diaphragms and are formed in the bottom of the frame;  
  
sliding grooves formed at both lower sides of the receiving grooves;  
  
and  
  
a cover having sliding jaws inserted into sliding grooves is inserted into the frame to shut tightly the receiving groove.

PATENT  
Docket: CU-4112

2. (currently amended) The duster as claimed in claim 4, further comprising an insertion groove **24** formed in the bottom of the frame **20**, wherein the magnetic sheet **40** having magnetism is inserted into the insertion groove **24** so that the magnetic sheet **40** forms a flat surface along with the bottom of the frame.

3. (currently amended) The duster as claimed in claim 4, wherein the frame **20** and the handle **30** are integrally formed of a synthetic resin material and the magnetic sheet **40** is insert-molded into the frame **20**.

4. (currently amended) The duster as claimed in claim 4, further comprising:  
a receiving-space element **22** having an opening **224** that is formed within the frame **20** in the longitudinal direction, so that the magnetic sheet **40** is selectively received into the receiving-space element **22**; and  
an open/close plug **222** detachably attached to the opening **221**.

5. (cancelled)

6. (currently amended) ~~The duster as claimed in claim 4~~ A duster for use on a vehicle comprising:

a frame having a plurality of holes;

a handle extending from one side of the frame;

a sack-shaped dust cloth capable of being connected to the frame;

a plurality of magnetic sheets, each having magnetism and each of which

Application Serial No. 10/715,026

PATENT  
Docket: CU-4112

is capable of being inserted into each circular hole of the frame;

a plurality of caps, each of which is capable of securely covering the hole  
to contain the respective magnetic sheet inserted in each hole;

wherein the frame is capable of being pulled to the exterior of the vehicle  
by means of magnetism to provide friction between the sack-shaped dust cloth  
connected to the frame and the exterior of the vehicle,

~~wherein the magnetic sheet 40 is divided in plural to form circular magnetic~~  
~~sheets 42, and wherein the duster further comprises:~~

~~a number of circular grooves 24 whose inner circumference has~~  
~~spiral grooves, respectively, wherein the circular grooves 24 are formed at~~  
~~a lower part of the frame 20 so that they are selectively contained within the~~  
~~circular grooves 24; and~~

~~circular caps 241 each having a spiral groove as its outer~~  
~~circumference, being screwed with the circular groove 24, and having a~~  
~~grasp groove 242 at its one side.~~

7. (new) The duster as claimed in claim 6, wherein the holes are circular in shape and the inner surface of each of the holes is threaded, and wherein the caps are circular in shape and the outer portion of each of the circular caps is also threaded in order to allow the circular cap to be screwed into the respective threaded circular hole, thereby securing containing the respective magnetic sheet inside the hole.

8. (new) The duster as claimed in claim 6, wherein the frame and the handle are
